

# Package ‘SIAmModules’

April 23, 2024

**Type** Package

**Title** Modules for 'ShinyItemAnalysis'

**Version** 0.1.1

**Date** 2024-04-23

**Description** Package including additional modules for interactive 'ShinyItemAnalysis' application for the psychometric analysis of educational tests, psychological assessments, health-related and other types of multi-item measurements, or ratings from multiple raters.

**License** GPL-3

**URL** <https://www.ShinyItemAnalysis.org>

**Depends** R (>= 3.5.0)

**Imports** cli, difNLR, dplyr, DT, forcats, ggplot2, glue, lme4, magrittr, mirt, mirtCAT, plotly, purrr, rlang, scales, shiny, ShinyItemAnalysis (>= 1.5.0), shinyjs, stringr, tibble, tidyr, yaml

**Encoding** UTF-8

**RoxygenNote** 7.3.1

**Config/ShinyItemAnalysis/module** true

**NeedsCompilation** no

**Author** Patricia Martinkova [aut, cre]  
(<<https://orcid.org/0000-0003-4754-8543>>),  
Jan Netik [aut] (<<https://orcid.org/0000-0002-3888-3203>>)

**Maintainer** Patricia Martinkova <[martinkova@cs.cas.cz](mailto:martinkova@cs.cas.cz)>

**Repository** CRAN

**Date/Publication** 2024-04-23 09:50:02 UTC

## R topics documented:

read_me . . . . .	2
sm_cat . . . . .	2
sm_dif_c . . . . .	3
sm_irr . . . . .	3

**Index****5**

---

read_me	<i>How to use this package</i>
---------	--------------------------------

---

**Description**

Prints information on how to use the modules included in the package. You may have already seen the same information when loading the package.

**Usage**

```
read_me()
```

**Details**

The printed message also displays hyperlinks to each module's help page, where you can find more detailed information, including the citation entry.

Note that if your console does not support hyperlinks, modules titles will be accompanied by a regular R code you may paste into your console to arrive at the same help page.

**Value**

An object of class `siamod_readme`. Called for side effects.

**Examples**

```
read_me()
```

---

sm_cat	<i>Interactive Module for Computerized Adaptive Tests</i>
--------	---

---

**Description**

Interactive illustration of computerized adaptive test (CAT) with the `mirrCAT` package.

sm\_irr

*Interactive Module for Range-restricted Reliability*

---

**Description**

Interactive illustration of range-restricted reliability issue and the difficulties with maximum likelihood estimation, described in more detail in the context of inter-rater reliability in grant proposal review.
